

NO CURE, NO PAY.

Electricity is Life.

MEDICAL ELECTRICITY.

BY DR. W. M. HAND.

Microscopic and Analytical Physician and Surgeon, Professor of Anatomy, Physiology, Pathology, Therapeutics, Toxicology, and Forensic Medicine, Salt Lake City, Utah. Medical Education of Salt Lake, Utah.

It is a mistake to suppose that while all other trades and professions have been advancing and improving that the practice of medicine has remained stationary. There is probably no profession in the world which has made more rapid progress in the last few years.

Dr. Hand, by means of his wonderful discoveries with the microscope, has reduced the practice of medicine to a science. Tracing all diseases, as he does, to a germ origin, their treatment becomes a simple matter, and enables the doctor to effect cures in cases that have been pronounced beyond medical or surgical skill, and in an incredibly short space of time. The microscopic examinations of specimens enables the doctor to determine accurately and immediately the disease with which the patient is afflicted, after which by means of his new and wonderful antiseptic treatment, he is able to apply the precise remedy indicated, and is not compelled to administer a multitude of different compounds, hoping some may reach the case, and in the end failing, after having administered a large amount of unnecessary medicine.

Dr. Hand treats with specific remedies the following named diseases: Every form of throat and lung disease, so-called consumption, asthma, hay fever, bronchitis, catarrh, diphtheria, deafness, dropsy, gutta, fits, epilepsy, falling sickness, St. Vitus dance, gravel, heart disease, in every form, chronic inflammation of the bladder, kidneys, womb and ovaries, all diseases of the stomach, liver and spleen, chronic sore eyes of every form—even partial blindness of years' standing, paralysis, rheumatism, neuritis, cholera, hysteria, nervousness, dyspepsia, scurvy, cancer, salt rheum, white swelling, abscess, dropsy, aneurism, varicose veins, hemorrhoids, piles, distula and tumors, rupture, scrofula. All diseases of a special, private or difficult and dangerous character and all diseases of women and children.

Dr. Hand is fifty-four years old, is a graduate of two medical colleges, one in the United States, the other in France, and has practiced medicine and surgery for the last thirty-three years: was physician and surgeon in the United States army from 1861 to 1866. Dr. Hand treats every form of chronic disease known to the medical profession, and has for the last twenty-two years successfully treated all chronic, special and nervous diseases.

Dr. Hand does not claim to be the only physician in the United States that understands his business, but he does claim that he understands the treatment of the diseases mentioned in this article more thoroughly than the graduate family physician, for the simple reason that he has practiced medicine and surgery in nearly every part of the United States, on land and on sea, and has lived in all climates; has treated nearly all nationalities and diseases and from his extensive travels, practice and experience, should be more capable of mastering every difficult, stubborn, chronic disease.

Dr. Hand advises all afflicted with disease doing well under the care of their family physician, not to change, but to let him stand by him. But he does claim that he understands the treatment of the diseases mentioned in this article more thoroughly than the graduate family physician, for the simple reason that he has practiced medicine and surgery in nearly every part of the United States, on land and on sea, and has lived in all climates; has treated nearly all nationalities and diseases and from his extensive travels, practice and experience, should be more capable of mastering every difficult, stubborn, chronic disease.

Dr. Hand does not claim to be the only physician in the United States that understands his business, but he does claim that he understands the treatment of the diseases mentioned in this article more thoroughly than the graduate family physician, for the simple reason that he has practiced medicine and surgery in nearly every part of the United States, on land and on sea, and has lived in all climates; has treated nearly all nationalities and diseases and from his extensive travels, practice and experience, should be more capable of mastering every difficult, stubborn, chronic disease.

Dr. Hand does not claim to be the only physician in the United States that understands his business, but he does claim that he understands the treatment of the diseases mentioned in this article more thoroughly than the graduate family physician, for the simple reason that he has practiced medicine and surgery in nearly every part of the United States, on land and on sea, and has lived in all climates; has treated nearly all nationalities and diseases and from his extensive travels, practice and experience, should be more capable of mastering every difficult, stubborn, chronic disease.

Dr. Hand does not claim to be the only physician in the United States that understands his business, but he does claim that he understands the treatment of the diseases mentioned in this article more thoroughly than the graduate family physician, for the simple reason that he has practiced medicine and surgery in nearly every part of the United States, on land and on sea, and has lived in all climates; has treated nearly all nationalities and diseases and from his extensive travels, practice and experience, should be more capable of mastering every difficult, stubborn, chronic disease.

He Meant Well.

On a Grand River car the other day were thirteen women and two men, and one of the latter, who was short and fat and fussy, suddenly laid down a paper he had been reading and stood up and said:

"Yes, that's so—that's so. I perfectly agree with him. Yes, ladies, it is my opinion that every one of you ought to learn how to swim."

All looked up in half scared way and the man continued:

"It might save your lives. Suppose you were on a steamboat, and the bottom dropped out of the durned critter, and what was left of it went under, where would you be? You'd sink like so many cobbles stones. But suppose you could swim? You'd simply kick off your shoes and start for the shore, and every blessed one of you would."

Here the conductor entered and whispered to the man, who followed him out, saying:

"But women order learn to swim—of course they had."

"Yes, but keep quiet!" whispered the conductor.

"Keep quiet? Is it again the law today that a woman order know how to?"

"Yes, but this is not the place."

"Not the place? Thirteen women here, and yet you don't want me to advise 'em that they order learn?"

"Come! Come!"

"Oh, you go to grass!" growled the man as he made for the steps. "I have all said that women order learn to swim. I know they had. If women could swim they'd have more confidence in themselves. Women, my advice to you is—"

But the conductor helped him a little and he dropped to the street, and as the car left him he walked after it and said:

"Well, if they don't want to learn to swim then let 'em get drowned!"—Detroit Free Press.

No Intentions.

A man with a bundle under his arm stopped at a fruit stand on Congress street with the evident intention of making a purchase, but before he had said anything a person standing near beckoned to him and asked:

"Were you going to buy a banana?"

"Yes, sir."

"Going to eat it on the street?"

"Very likely."

"Going to drop the skin on the sidewalk?"

"No, sir. I've got seven children at home, and I can't afford any such extravagance."—Detroit Free Press.

The Scheme Failed.

Filipson—Young Waggle has got the laugh turned against himself in his little joke on the Eliazes Fire Insurance company.

Filipson—How?

Filipson—He insured 500 cigars, smoked them, and then sent in a claim on the ground that they had been destroyed by fire.

Filipson—They laughed at him, I suppose.

Filipson—No. They had him arrested on a charge of arson.—The Jester.

The Heaviest Attraction.

Master Robert tells us of the glories of his papa's new house. "There is a beautiful large entrance, with carved stone windows, and on the top of the house there is a splendid cupola."

"You don't say so?"

"Yes; and that's not all. Something else is going to be put on. I know, because I heard papa whisper to mamma that he intended to have a mortgage on the house."—London Tit-Bits.

Time Tells.

Uncle Dick to a year-old Alice, who tries in vain to capture a sparrow in the park—Put some salt on its tail, Alice, and then you can catch it easily.

Alice—I used to do that, Uncle Dick, but I can't now.

Uncle Dick—And why not?

Alice—Because I'm too old.—Harper's Young People.

An Accommodating Suitor.

"Where are you off to?"

"To apply for the hand of one of M—'s daughters, daughters."

"Which of them?"

"That depends. If he looks pleasant I'll take the youngest; but if he's cross, the oldest."—Humoristische Blätter.

She Didn't Object.

W. Childers Kyd (looking for board)—Oh, I forgot to mention that two of my party of four are small children. I hope that will make no difference.

Mrs. Hackett (trembling)—Oh, not at all. I shall charge just the same as if they were grown up.—Puck.

Still Farther.

"I haven't seen anything of De Wiggles lately," said Squidly. "Oh, he's buckled down to work now," replied McSwilligan.

"Buckled down? If he's anything like what he used to be he'll have to be chained down to keep him at it!"—Pittsburg Chronicle.

A Change of Currency.

"You've wretched quarters here, Joe."

"Yes, I'm looking around for a better half."—Keystone.

That Settles It.

Wife—I am undecided whether to go to Newport or Long Branch this season.

Husband—You had better remain undecided until fall, for I have no money to go to either place.—Munsey's Weekly.

Lawn tennis sashes, belts, blouses, shirts and blazers.
